## **RSC Bio Solutions' Environmentally Acceptable Lubricants (EALs) Now Available Through Drew Marine**

**CHARLOTTE, N.C. (September 11, 2017)** – [RSC Bio Solutions'](#) high performance Environmentally Acceptable Lubricants (EALs) are now available through [Drew Marine's](#) global supply chain network. Drew Marine's network is capable of delivering to more than 900 ports worldwide.

Earlier this year, RSC Bio Solutions and Drew Marine announced a new global marine distribution partnership. This strategic alliance has expanded the global availability of RSC Bio Solutions' extensive range of EALs, which are now delivered through Drew Marine's global marine network. The following **RSC FUTERRA™** and **RSC EnviroLogic®** products are currently stocked by Drew Marine worldwide:

- [RSC FUTERRA HF Series](#) renewable hydrocarbon hydraulic fluids are Ecolabel certified and formulated to withstand extreme conditions and corrosion while operating in severe environments. Available in 46, 68 and 100 viscosity grades. Typical applications include stern tubes, controllable pitch propellers, stabilizers and various deck equipment.
- [RSC EnviroLogic GO Series](#) readily biodegradable synthetic gear oils are formulated for harsh marine applications. Available in 68 and 100 viscosity grades. Thrusters, controllable pitch propellers and ancillary equipment are some of the typical applications that use gear oils.
- [RSC EnviroLogic Grease 0](#) biodegradable Lithium Complex grease is designed for multi-purpose use in harsh marine applications, including RO/RO ramp latches, steering gear and centralized pump systems with extended distances.

For inquiries related to the supply of cargo and passenger ships, customers should contact their Drew Marine representative or send inquiries to [rsc@drew-marine.com](mailto:rsc@drew-marine.com). For inquiries not related to the

supply of cargo or passenger ships, or for help locating RSC Bio Solutions' products, please visit [www.rscbio.com/distribution-network](http://www.rscbio.com/distribution-network) or contact [customerservice@rscbio.com](mailto:customerservice@rscbio.com).

### **About RSC Bio Solutions, LLC**

Headquartered in Charlotte, North Carolina, USA, RSC Bio Solutions has a 20+ year history of providing sustainable solutions for unforgiving environments by offering equipment operators high-performing, biodegradable alternatives that meet the demanding operating needs while reducing environmental and employee risk. The RSC FUTERRA™ HF Series is the only hydrocarbon renewable EAL designed to outperform other products on the market today, delivering Ecolabel certification to meet the most stringent global environmental regulations. RSC Bio Solutions also manufactures the EnviroLogic® branded technology, which includes a full line of hydraulic fluids, gear oils and greases, along with an innovative line of cleaners and solvents for industrial markets. For more information, visit [www.rscbio.com](http://www.rscbio.com).
